

1) Explain about test design technique with example

Test Design technique:-

It is a testing which is use to test the exact value is been in the give design (or) in data.

Example:-

The Best example for Test design technique is OTP Pin.

The OTP should contains only 4 num (or) 6 digit Pin value.

It will check by validate (or) in validate.

For example:-

OTP	validate	Invalid
Ans 4567	4567	3 2 1
OTP should value 4 digit	↓ It contain only 4 num digit	↓ It contains only 3 num

So if we need to enter the value valid should be in 4 digits.

valid & invalid:-

valid - 1 to 10

Invalid - less than 0

Invalid - -1 to -10.
